PIA-KELLY PIANI-KELLY Z-KELLY AL-KELLY

*Rain covers for
PIANO , PIANISSIMO , ZEPHYX , ALBERT windshields*

The thick layer (3cm) of the large cell foam is first made to reduce the noise of the rain drops.

Warning:

The **Nikwax[®]** waterproof liquid **must NOT be sprayed on the foam.**

It is made for treatment of the main cover fabric.

It lets the water roll off the fabric surface, keeping the cover as dry as possible and acoustically transparent. It also prevents water going inside the windshield walls.

1. Remove the lower part of the main fabric cover (black/grey).
2. Put it together with the top cover in a basin.
3. Spray the fabrics **generously**. (They must be completely wet)
4. Dry the fabric overnight.

The treatment has to be repeated from time to time, depending on the conditions of use.
